TABLE OF CONTENTS

HIGH TEMPERATURE

Volume 4, 1966

(A translation of Teplofizika Vysokikh Temperatur)

Engl./Russ.

Number 1 January-February, 1966

The excitation of Atoms by Neutral Particles — A. V. Vinogradov and I. A. Poluéktov.	1	3
Concentration Waves of Charged Particles in a Moving Plasma — O. R. Konenko and A. K. Musin.	9	12
Spectroscopic Study of the Plasma of a Low-Voltage Pulse Discharge in Vacuum — V. A. Derevshchikov and M. A. Deryabina.	16	20
Excitation of Ionic Sound Waves in Potassium and Cesium Plasma — N. S. Buchel'nikova and R. A. Salimov.	23	27
Energy Balance of a Stationary Induced Discharge — R. E. Rovinskii, V. A. Gruzdev, and I. P. Shirokova.	30	35
Interaction of Supersonic Jets under Pulse Conditions — M. A. Sultanov and L. I. Kiselevskii.	34	40
Thermal Conductivity and Emissivity of Niobium at Temperatures above 1000° C — V. Yu. Voskresenskii, V. É. Peletskii, and D. L. Timrot.	39	46
Experimental Determination of the Saturated Vapor Pressure of Sodium and Potassium — Yu. K. Vinogradov and L. D. Volyak.	43	50
Chemical Equilibrium of Multitemperature Systems — A. V. Potapov.	48	55
Hysteresis Phenomena in Conducting Gas Flows in the Channel of an MHD Energy Converter — L. A. Vulis and K. E. Dzhaugashtin.	52	59
Approximate Allowance for the Variation in the Electrical Conductivity of the Gas in Vortical Magneto-Gas-Dynamic Flow — A. I. Bertinov, D. A. But, V. N. Kalugin, and P. V. Vasyukevich	58	66
Two-Dimensional Isothermal Flow of Electrically Conducting Liquids and Gases in Channels in the Presence of Electric and Magnetic Fields — I. K. Kukin and G. G. Smolin.	65	73
Heat Transfer from a Rapidly Moving Arc Spot — V. I. Krylovich and T. N. Abramenko.	71	80
The Theory of Nonlinear Skin-Effect — M. I. Koselev and K. P. Stanyukovich.	78	87
Influence of Heat Flux on Hydraulic Resistance and Heat Exchange in the Turbulent Flow of Liquids in Tubes — E. M. Khabakhnasheva and I. M. Gruzdeva.	82	92
Characteristics of a Strip Radiator Including Self-Irradiation and Real Contact — A. L. Stasenko.	89	99
Temperature Field on a Thin, Square, Cross-Sectioned Rod during Free Cooling — E. S. Platunov.	97	108
Resistance of Corundum Ceramic to Liquid Potassium-Sodium Alloy — N. I. Kolosova, F. Ya. Kharitonov, G. I. Tsirlina, N. S. Kostyukov, and B. P. Golubev.	103	115
Layers of Abrupt Change of Potential on "Hot" Electrodes — G. A. Lyubimov.	107	120
New Instruments for Thermophysical Measurements — L. A. Novitskii and N. N. Ergardt.	120	132
BRIEF COMMUNICATIONS		
Theory of the Voltage-Current Curve for a One-Dimensional Gas Discharge — Yu. Ya. Polyak.	122	134
Average Diffusion Cross-Sections for Elastic Collisions of Electrons with Atoms — E. P. Vaulin and V. A. Ovcharenko.	125	136
Calculation of Dissociation Energies for the Halides of the Scandium Subgroup — K. S. Krasnov.	128	139
Viscosity and Thermal Conductivity of the Vapors of Sodium and Potassium — B. I. Stefanov, D. L. Timrot, E. E. Totskii, and Chu Wen-hao.	131	141
Effects of Mode of Evaporation on Heat Transfer in Condensation and Evaporation — V. I. Subbotin, M. N. Ivanovskii, and Yu. V. Milovanov.	133	143
Thermal Properties of Molybdenum at High Temperatures — L. A. Pigal'skaya, R. P. Yurchak I. N. Makarenko, and L. P. Filippov.	135	144

Measurement of the Rate of Growth of Vapor Bubbles during the Boiling of Different Liquids —V. S. Golovin, B. A. Kol'chugin, and É. A. Zakharova 138 147
New Books 140 150

Number 2 March-April, 1966

Trapping Cross Sections of Electrons with Respect to Spherical Particles and Thermal Ionization of the Particles—E. V. Samuilov 143 143
Optical Properties of Air in the Temperature Range 4000 to 10,000°K—L. M. Biberman and A. Kh. Mnatsakanyan 148 148
Some Electrical Properties of a Rarefied Acetylene-Air Flame with an Admixture of Alkali-Metal Salts—É. N. Taran and V. I. Tverdokhlebov 160 160
The Theory of High-Frequency Vortex Discharges at High Pressure. I—V. N. Soshnikov and E. S. Trekhov 165 166
Stabilized Columns of Arcs with Axial Gas Flow—A. V. Pustogarov 172 173
Conductivity and Velocity behind a Detonation Front in a Gas—R. I. Soloukhin 176 177
Emissivity of Molybdenum Disilicide Coatings—G. A. Zhorov and E. V. Sivakova 180 182
Study of the Surface Tension of Liquid Sodium and Potassium—A. N. Solov'ev and O. P. Makarova 187 189
Some Dimensionless Numbers in the Physical Properties of Matter—P. M. Kessel'man 193 196
Properties of Corundum Microlite When Used for Construction Purposes at High Temperatures —B. P. Golubev, F. Ya. Kharitonov, P. P. Kalitin, G. A. Vasil'eva, and S. N. Smirnov 198 202
Some Electrophysical Properties of Niobium and Zirconium Carbides in Their Homogeneous Regions—G. V. Samsonov and A. D. Panasyuk 203 207
Temperature Dependence of the Thermal Conductivity of Chemically Nonreacting Rarefied Gas Mixtures—S. A. Ulybin, V. P. Bugrov, and A. V. Il'in 210 214
Certain Characteristics Associated with the Flow of a Molten Film—V. V. Gorskii and Yu. V. Polezhaev 214 218
Experimental Study of Heat Transfer during the Supersonic Flow of Gas in a Circular Tube —B. S. Petukhov and V. A. Mukhin 224 228
Effect of a Longitudinal Magnetic Field on the Resistance Coefficient for the Flow of Mercury in a Circular Tube—L. G. Genin and V. G. Zhilin 229 233
Certain Characteristics of Transpiration Cooling by a Swirling Flow—R. Z. Alimov 233 238
Approximate Method of Solving the Nonlinear Heat Conduction Problem for an Infinite Plate in the Case When the Thermophysical Constants Depend on the Temperature —I. G. Meerovich 237 242
Determination of the Temperature Field and the Maximum Heat Flux around the Cooling Perimeter of Channels with Straight Longitudinal Fins—V. K. Shcherbakov and V. V. Bosyi 244 250
Thermal Conditions in the Cavity Radiation Receivers of Mirror-Type Solar Energy Equipment, as Derived from the Structure of the Radiation Field—R. A. Zakhidov and D. I. Teplyakov 249 255
Distortion of Temperature Field in the Region of Location of a Thermocouple—V. N. Popov 255 261
Probable Efficiency of a Power Station with High-Output Open-Type MHD Generators —V. A. Kirillin, G. I. Rossievskii, M. A. Styrikovich, and A. E. Sheindlin 261 267
The Effect of Pressure on the Efficiency of Sectional Arc Gas Heaters—N. A. Chesnokov, G. P. Stel'makh, and A. S. Sakhiev 267 274

REVIEWS

Methods of Measuring Temperatures in Nuclear Reactors—V. A. Krivtsov, G. I. Gushchin, and A. A. Fraktovnikova 272 279

BRIEF COMMUNICATIONS

Vibrational Relaxation in a Recombining Expanding Gas—N. M. Kuznetsov 275 282

Motion of a Conducting Dissociable Gas in a Channel of Constant Cross Section in the Presence of a Magnetic Field—B. N. Veretennikov 279 285

Thermal Ionization in a Magnetic Field—V. M. Dubner 281 286

Kinetic Coefficients for Inert Gases at High Temperatures—A. B. Kamnev and V. B. Leonas 283 288

Thermal Conductivity of Hydrogen and Argon—D. L. Timrot and A. S. Umanskii 285 289

A Thermodynamic Method of Deriving the Heat of Dissociation of a Gas —É. É. Shpil'rain 288 292

Thermal Diffusivity of Tungsten at High Temperatures—L. A. Pigal'skaya, L. P. Filippov, and V. D. Borisov 290 293

Thermophysical Properties of Heat-Resistant Tungsten-Rhenium Alloy VR-27-VT —V. E. Peletskii and V. Yu. Voskresenskii 293 296

Local and Averaged Geometrical Optics and Energy Characteristics of the Radiation from an Unclosed Cylindrical Cavity—V. M. Melent'ev 295 297

BIBLIOGRAPHY

New Books 299 300

Number 3 May-June, 1966

Conditions of Validity of the Local Thermodynamic Equilibrium Approximation —A. N. Lagar'kov 301 305

The Electron Velocity Distribution in a Nonequilibrium Plasma—K. N. Ul'yanov 309 314

On the Theory of the High-Frequency Turbulent Discharge at High Pressure. II —V. N. Soshnikov and E. S. Trekhov 318 324

The Geometry of Electrodeless Discharge Induced in Inert Gases—R. E. Rovinskii, L. E. Belousova, and V. A. Gruzdev 322 328

Thermophysical Properties of Tantalum at Temperatures above 1000°C —V. É. Peletskii and V. Yu. Voskresenskii 329 336

Thermophysical Properties of the Two-Phase Region of Constant-Composition Binary Solutions—L. R. Fokin 334 343

Heat Transfer Properties of Loose-Fiber Materials in Vacuum—V. M. Kostylev 341 351

Investigation of the Thermal Insulating Properties of Kaolin Fibers —P. E. Krzhizhanovskii and I. I. Chudnovskaya 344 355

Densities of Lithium, Sodium, and Potassium at Temperatures up to 1500-1600°C —E. I. Gol'tsova 348 360

Experimental Data on the Velocity of Sound in Alkali Metals at Temperatures up to 800°C —Yu. S. Trelin, I. N. Vasil'ev, V. B. Proskurin, and T. A. Tsyganova 352 364

The Effect of Electric and Magnetic Fields on Heat Exchange Between a Laminar Flow of a Liquid and a Plane Channel—L. G. Genin and A. K. Podshibyakin 356 369

The Mechanism of the Electrode Erosion Produced by Supersonic Flares in a Pulse Discharge—M. A. Sultanov and L. I. Kiselevskii 361 375

The Three-Dimensional Correlation Coefficients and the Transverse Scales of the Temperature Perturbations in Turbulent Flow of Mercury in a Round Tube—V. P. Bobkov, M. Kh. Ibragimov, E. V. Nomofilov, and V. I. Subbotin 367 380

Experimental Study of Heat Exchange in Carbon Dioxide in the Supercritical Range at High Temperature Drops—E. A. Krasnoshchekov and V. S. Protopopov 375 389
On the True Temperature of the Wall in a Flow of Supersaturated Steam —V. S. Zhukovskii, V. L. Madievskii, and K. I. Reznikovich 383 399
Numerical Calculation of the Temperature Fields in Heat Insulating Coatings —I. F. Zherebyat'ev, A. T. Luk'yanov, V. N. Prilepskii, and V. G. Puzach 390 407
One Method of Measuring Reduced Emissivities for a Coaxial System of Surfaces —L. I. Kunyrina and A. S. Titkov 394 412
Variation of Temperature During the First Stage of an Electric Explosion of Wires —V. M. Kul'gavchuk, Yu. B. Shishkin, and I. A. Berezin 399 419
Thermodynamics of Cycles Based on the Mixing of Molten Metal in Front of a MHD Converter—D. D. Kalafati and V. B. Kozlov 403 424

REVIEWS
Charge Transfer in Slow Collisions—B. M. Smirnov 407 429

BRIEF COMMUNICATIONS
Change in Deviation from Ideal Behavior in a Vapor along a Saturation Line —É. É. Shpil'rain 427 450
Products of Evaporation of Cesium Peroxide—A. G. Efimova, A. V. Gusarov, and L. N. Gorokhov 429 451
Automodel Motion in Magneto-Gas Dynamics Involving Variable Conductivity —M. I. Kiselev 430 452
Operation of a Thermionic-Emission Converter in a Mixture of Cesium and Neon —E. S. Bekmukhambetov, Yu. K. Gus'kov, and S. Ya. Lebedev 432 454
High-Temperature Dilatometer in Which the Sample is Heated with Electric Current —P. N. V'yugov and V. S. Gumenyuk 435 457
Device for Measuring the True Specific Heat of Heat-Resistant Materials under Cooling Conditions—S. E. Buravoi and E. S. Platunov 438 459
Radiative Heat Transfer between Two Narrow Strips—V. M. Melent'ev 441 462

CHRONICLES
Fifth Scientific Conference on Questions of Evaporation, Combustion, and Gas Dynamics of Dispersed Systems—D. I. Polishchuk 444 466

DISCUSSIONS
Questions of the Thermodynamics of the Critical Point—K. A. Yakimovich 447 469

Number 4 July-August, 1966

Determination of Photoionization Cross Sections from the Oscillator Strengths of Spectral Lines —G. A. Kobzev, G. É. Norman, and K. I. Seryakov 449 473
Establishment of an Electrical Current in Moving Plasma Under Conditions of Thermionic Emmission—A. K. Musin 456 480
Exchange of Energy between Electron and Molecular Gas—L. M. Biberman and A. Kh. Mnatsakanyan . 465 491
Effect of Radiation Reabsorption on Deviation from Thermodynamic Equilibrium—V. S. Vorob'ev ... 468 494
Relation of Radius to Power for a Thermal Plasma of Spherical Shape—L. E. Belousova 472 499
Approximate Calculation of the Surface Tension of Molten Alkali Metals—A. N. Solov'ev and A. B. Kaplun 476 503
Composition and Thermodynamic Properties of Combustion Products of Methane with Ionizing Additions—V. S. Yungman, L. V. Gurvich, and N. P. Rtishcheva 480 507

Use of Thermodynamic Similarity to Determine Boyle Curves of Substances Investigated in a Limited Temperature Range—Ya. Z. Kazavchinskii, V. I. Kudashev, and V. I. Nedostup .. 485 513
Experimental Investigation of the Thermal Properties of Aqueous and Vapor Solutions of Sodium and Potassium Chlorides at Phase Equilibrium—I. Kh. Khaibullin and N. M. Borisov 489 518
A Contribution to the Theory of Magnetogasdynamic Flow—N. I. Kolosnitsyn 495 524
Theoretical Calculation of the Heat Transfer and Friction Drag in the Laminar Flow of Equilibrium-Dissociating Hydrogen in a Tube—V. N. Popov and B. S. Petukhov 502 531
Calculation of the Temperature Field in a Turbulent Fluid Flow in the Thermal Entry Section of a Circular Tube—N. I. Buleev, L. D. El'tsova, and G. P. Biryukova 510 540
Heat Transfer Crisis in an Evaporating Pipe—V. E. Doroshchuk 522 552
Optimization of the Flow and Load Regimes of Magnetohydrodynamic Generators—V. V. Breev and A. V. Gubarev 530 562
Comparison of Different Types of Magnet Systems for a Magnetohydrodynamic Generator—B. K. Bul' and O. B. Bul' 539 572

REVIEWS
Methods and Means of Investigating Thermal Radiation of Bodies—L. A. Novitskii 544 577

BRIEF COMMUNICATIONS
Nonthermal Radiation of Sodium in a Carbon Monoxide Medium with Admixtures—A. Kh. Sharfshtein 555 588
Vapor Composition over Potassium Oxide—A. V. Gusarov and L. N. Gorokhov 558 590
Thermal Diffusivity and Electrical Conductivity of Alloys of the Copper-Antimony System in the Liquid State—Ya. I. Dutchak and P. V. Panasyuk 560 592
Use of the Small-Contact Method for Measuring the Thermoelectric Quality Factor of Liquid Cu_2S—O. P. Astakhov 562 594
Use of Continuous Heating in the Study of Heat Transfer for Mercury Flowing in a Pipe—L. S. Kokorev, V. I. Petrovichev, and N. N. Del'vin 564 595

CHRONICLES 566 598

Number 5 September-October, 1966

Quasi-Stationary Theory of Nonstationary Processes — K. N. Ul'yanov 567 601
Radiating Power of Argon at High Temperatures and Pressures — V. A. Golubev and Yu. N. Ivanov. 571 606
Method of Determining the Electrical Conductivity of Low-Temperature Plasma with a Double Probe — M. B. Khozhatelev and L. P. Yarin 576 611
Magnetic Method of Measuring the Electrical Conductivity of Ionized Gases — V. I. Fedulov and G. D. Efremova 580 615
Some Effects Noticed when Studying an Electric Arc in a Gas Flow — V. Yu. Baranov 585 621
Estimating the Effect of the Exchange Reaction $H + H_2 = H_2 + H$ on the Transfer Coefficient of Dissociating Hydrogen — V. A. Belov 588 625
Errors in the Thermodynamic Functions Calculated for Ideal Gases from Molecular Data—G. A. Khachkuruzov 592 630
Second Virial Coefficient of Steam at High Temperatures — A. L. Tsykalo 598 637
Thermal Conductivity and Emissivity of Aluminum Oxide Coatings at High Temperatures—G. A. Zhorov, A. I. Kovalev, and E. V. Sivakova 603 643
Determination of the Enthalpy of Self-Bound Silicon Carbide in the 1300-2000°K Temperature Range — E. A. Guseva, A. S. Bolgar, S. P. Gordienko, V. A. Gorbatyuk, and V. V. Fesenko. . 609 649
Specific Heat, Enthalpy, and Entropy of Cr_5Si_3 and $CrSi_2$ — G. I. Kalishevich, P. V. Gel'd, and R. P. Krentsis 613 653

Application of the Ritz and Trefftz Variational Methods in the Calculation of Thermal Conductivity in Defective Nuclear-Reactor Fuel Elements – E. S. Turilina, and K. D. Voskresenskii 619 660
Biot's Variational Method in Thermal Conductivity Problems Involving a Change in Phase State with a Plane Phase Separation Boundary – É. M. Gol'dfarb and O. S. Ereskovskii 628 670
General Laws in the Stabilization of the Heat-Transfer Coefficient for the Flow of a Liquid in a Channel – V. D. Vilenskii 633 675
Heat Exchange when a Viscous Liquid is Flowing between a Stationary Baffle and a Rotating Disk with a Gas Blowing onto It – L. A. Dorfman 640 683
Theoretical Calculation of the Heat Transfer and Friction Drag for Carbon Dioxide in the Supercritical Region during Laminar Flow in a Circular Tube – V. N. Popov 646 689
Calculation of Heat Transfer during Turbulent Gas Flow in a Long Cylindrical Channel with an Arbitrary Distribution of the Thermal Load and Substantial Nonisothermicity – S. S. Kutateladze, A. I. Leont'ev, and A. K. Pimenov 653 698
Regularities in the High-Temperature Reaction of Carbon in the Presence of Solid Phase Diffusion – E. S. Golovina and L. L. Kotova 658 703

SURVEYS

Methods of Determining the Interaction Potentials of Atoms, Molecules, and Ions – V. B. Leonas and E. V. Samuilov 664 710
New Instruments for Thermophysical Investigations – L. A. Novitskii and N. N. Ergardt 677 725

BRIEF COMMUNICATIONS

Nonequilibrium Conductivity of Argon-Cesium Plasma – G. A. Kasabov 681 729
Calculation of the Statistical Sum of an Atom – L. S. Veksler and V. M. Dubner 683 730
Kinetic Coefficients of Molecular Oxygen and Nitrogen at High Temperatures – Yu. N. Belyaev and B. V. Leonas 686 732
Flow of a Liquid in a Dihedral Angular Channel – E. M. Khabakhpasheva and B. V. Perepelitsa 687 733
Influence of Nonisothermicity on the Coefficient of Fluid Friction for the Turbulent Motion of Water in Tubes with Artificial Swirling Elements – É. K. Kalinin and S. A. Yarkho 690 736

REVIEWS
